

Water and Energy Workshop

February 15– 17, 2015

Hamad bin Khalifa University Student Center

Doha, Qatar

Speaker Profiles

Dr. Adil Sharif

The Qatar Environment and Energy Research Institute

Adel Sharif is a Research Director in QEERI since September 2013. His main research interests are in osmosis science and membrane separation with applications in desalination, water reuse and the integration of desalination with solar energy and osmotic power. He got his M. Sc. and PhD from University of Wales Swansea. Before joining QEERI he was a Professor of Water Engineering and Process Innovation, and Founder Director of the Centre for Osmosis Research and Applications, (CORA) at the University of Surrey. He is a founder of Modern Water plc, a

London Exchange AIM Market listed company specialized in desalination and renewable power generation. Prof. Sharif is a member of the Qatar Foundation's Expatriate Arab Scientists Forum. He has over 100 publications; is an inventor and co-inventor of more than 15 patents and has supervised over twenty PhD projects and more than 40 M.Sc. dissertations.
